## Amendments to the Claims

- 1. (Currently Amended) A flexible planar laminate comprising a layer of kraft paper to which is adhered a vapor barrier layer consistently consisting essentially of high density polyethylene (HDPE) or of polypropylene to which is adhered an adhesive layer of low density polyethylene (LDPE), wherein the water vapor transmission rate for said laminate is under about 1.0 g/h·m<sup>2</sup>.
- 2. (Original) The flexible planar laminate of claim 1 which comprises from 2 to 10 pounds of HDPE and from 3 to 10 pounds of LDPE per 3000 square feet of kraft paper having a weight of 30 to 50 pounds per 3000 square feet.
- 3. (Original) The flexible planar laminate of claim 2 which comprises 7 pounds of HDPE and 5 pounds of LDPE per 3000 square feet of kraft paper.
- 4. (Original) The flexible planar laminate of claim 1 in which the barrier layer is HDPE and the softening point of the LDPE is from 25 to 75 F° lower than the softening point of the HDPE.
- 5. (Original) The flexible planar laminate of claim 1 in which the barrier layer is polypropylene and the softening point of the LDPE is from 50 to 150 F° lower than the softening point of the polypropylene.

- 9. (Currently Amended) A fiberglass insulation product comprising a layer of fiberglass wool and a flexible planar laminate comprising:
  - a) an external support layer of kraft paper,
  - b) to which is adhered a central vapor barrier layer of high density polyethylene (HDPE) or of polypropylene; and

25049A

Road

c) to which is adhered an internal adhesive layer of low density polyethylene (LDPE) adhered to said central vapor barrier layer, wherein said layer of fiberglass wool is adhered to said internal adhesive layer, wherein the water vapor transmission rate for said laminate is under about 1.0 g/h·m<sup>2</sup>.

- 10. (Original) The fiberglass insulation product of claim 9 in which the flexible planar laminate comprises from 2 to 10 pounds of HDPE and from 3 to 10 pounds of LDPE per 3000 square feet of kraft paper having a weight of 30 to 50 lbs/ft<sup>2</sup>.
- 11. (Original) The fiberglass insulation product of claim 10 in which the flexible planar laminate comprises 7 pounds of HDPE and 5 pounds of LDPE per 3000 square feet of kraft paper.
